

Job offer

AC2T research GmbH

Sensor Electronics Developer

As the **Austrian Competence Centre for Tribology** (www.ac2t.at), we are developing technical-scientific solutions around the topics of **friction, wear and lubricant application** since more than 20 years.

To expand our team in the area of "Measurement Technology and Sensor Development" we are looking for new employees for the development of new sensor electronics concepts.

We offer the possibility to use the work results for a BSc or MSc thesis.

ACTIVITIES

- Design of the measurement electronics & control units
- Printed circuit board layout & selection of suitable electronics-components
- Mounting of measurement electronics
- Programming of controllers (e.g., microcontrollers)
- Experimental verification of the functionality

REQUIREMENTS

- Advanced bachelor's or current master's degree programme in mechatronics, electrical engineering, or similar qualification
- Ability to work in a team, own initiative, ability to discuss, manual skills
- German & English

OUR OFFER

- Start of employment: immediately
- Scope of employment: full-time (40 h/week); part-time possible
- Place of employment: TFZ Wiener Neustadt
- Professional supervision and support by a competent team
- Minimum gross salary (BSc level): 2.400 €/month (overpayment depending on the individual qualifications possible)
